Book Cover Template

For Adobe InDesign CS5
8.5 x 11 book, 83-110 pages

More book templates are available at:
www.48HrBooks.com/templates.asp

Yellow area is the Spine. Type should run from top to bottom. Also, leave 1/2” free space at top and bottom.

Pink area is for the Bleed. Make your background go all the way to the outer edge of the pink area, or you may have unwanted white lines on the edges. **This area will get trimmed off.**

White area is for the Design. Keep all wording and important artwork (except for your background) inside the white area. **Please keep text & artwork away from the edges!**

When you are finished with the layout, save your InDesign file for future editing. Then select “File > Adobe PDF Presets > Press Quality” to create a PDF file. **Examine the resulting PDF carefully before sending it to us.** The yellow and pink elements are set to “Non-Printing.” If they appear in your PDF, do the Export to PDF again, but be sure the “include non-printing items” option in the Export dialog box is UNchecked.

Bleed (pink area): 0.125
inches on all sides

Height
(with bleed):
11.25 inches

(Height
without bleed:
11 inches)

Back Cover: 8.5 inches

Spine: 0.25 inches

Front Cover: 8.5 inches

Width of whole document (with bleed): 17.5 inches

(Width of whole document without bleed: 17.25 inches)
